1725 Eye St. NW, 10th Floor, Washington, DC 20006

Mr. Prindle helps lead ICF's growing Energy Efficiency business within the Energy and Resources practice. He supports various programs in U.S. EPA's Climate Protection Partnerships Division, leads the firm's tracking initiative for the American Recovery and Reinvestment Act's energy efficiency provisions, works with utility clients on energy efficiency programs and regulatory issues, and supports other ICF climate policy and strategy efforts.

Prior to joining ICF in 2008, Mr. Prindle served as Deputy Director at the American Council for an Energy-Efficient Economy, a leading policy research and advocacy nonprofit group founded in 1980 by leading research scientists to articulate the policy case for energy efficiency. He directed ACEEE's energy policy program, conducting policy analysis and advocacy on energy efficiency issues at the national and state levels, and also oversaw internal operations. Prior to joining ACEEE in 2002, he directed buildings and utilities programs for The Alliance to Save Energy for several years.

Other key roles have included:

- Senior consultant with Barakat & Chamberlin, Inc., where he helped utility clients develop energy efficiency programs for commercial, industrial, and residential customers
- Manager of commercial/industrial marketing for the Edison Electric Institute, where he documented best-practice technology applications for larger customers.
- Senior energy management consultant for Peat Marwick Mitchell (now KPMG), where he developed energy management projects for business clients

In more than 30 years in the energy field, Mr. Prindle has developed a rich body of experience in energy management across most major markets and technologies, from steelmaking to food processing to wastewater treatment to home weatherization. In addition to his knowledge of markets and technologies, he had become known as an energy policy expert, providing testimony to Congress as well as state legislature and utility commissions on many occasions, and has published widely in the professional literature, and has appeared often on radio and television.

Mr. Prindle earned a B.A. degree in Psychology from Swarthmore College and an M.S. in Energy Management and Policy from the University of Pennsylvania.

ICF International, a global professional services firm, partners with government and commercial clients to deliver consulting services and technology solutions in energy, climate change, environment, transportation, social programs, health, defense, and emergency management.
